

Logitech® Logitech Comfort Wave 450 Keyboard. Swiss.

PART NUMBER: 920-001420. Brown box-new.

A small keyboard that brings big comfort and productivity to your office, classroom, or busy support center with a wave design, padded palm rest, and ten hot keys.

Wave-shaped key frame
Your fingers vary in length. So with its gradual wave-shaped contour, this keyboard supports the actual, varied lengths of your fingers.

Constant curve
The curved profile has a familiar shape and consistently sized keys, so you can type with comfort and confidence—without relearning how to type.

Padded, contoured palm rest
You can add the palm rest for more support—or remove it to fit your keyboard tray or save space on your desk.

Front and rear tilt legs
It offers you multiple levels of adjustment, including two degrees of negative slope for proper wrist alignment while you type.

Small, streamlined form
The small footprint keeps your workspace clear—perfect for offices, classrooms, and busy support centers.

Ten hot keys
You can save time with instant access to your favorite applications, folders, media controls, and Web pages.

Easy-to-find LED notifications
Conveniently placed LEDs right under the hot keys let you keep track of caps lock, num lock, and scroll lock to prevent mistakes.

Software-free installation
Plug-and-play simplicity saves you time and resources—even advanced functions work right out of the box without drivers.

○ **KEYBOARD**

- Corded USB keyboard
